International Journal of Mass Spectrometry and Ion Processes

SUBJECT INDEX

Ab initio molecular calculations
Experimental and theoretical study of carbon suboxide C_3O_2, protonated carbon suboxide $C_3HO_2^+$ and $C_3HO_2^{\cdot}$ radical in the gas phase 241
Aluminium
Mass distributions of binary aluminium cluster anions $Al_nX_m^-$ (X = O, S, P, As, C) 201
Analytical simulation
Ion separation in imperfect fields of the quadrupole mass analyzer. Part I. Ion beam dynamics in the phase-space 13
Aromatic substitution
Gas phase substitution reactions by radical cations. Part 5: Reaction of the C–C ring-opened oxirane radical cation with 1,2-, 1,3- and 1,4-dichlorobenzene 1

Background subtraction
Automatic extraction of relevant peaks and reconstruction of mass spectra for low signal-to-noise GC–MS data 171
Binary cluster anion
Mass distributions of binary aluminium cluster anions $Al_nX_m^-$ (X = O, S, P, As, C) 201
Borocations
Differentiation of stereoisomeric diols by using CH_3O-B^+OCH_3 in a small Fourier transform ion cyclotron resonance mass spectrometer 229

Carbon suboxide
Experimental and theoretical study of carbon suboxide C_3O_2, protonated carbon suboxide $C_3HO_2^+$ and $C_3HO_2^{\cdot}$ radical in the gas phase 241
Cell geometries
Optimization of a fixed-volume open geometry trapped ion cell for Fourier transform ion cyclotron mass spectrometry 189
Chemical ionization
Gas phase substitution reactions by radical cations. Part 5: Reaction of the C–C ring-opened oxirane radical cation with 1,2-, 1,3- and 1,4-dichlorobenzene 1
Cluster
Fragmentation of sputtered Ta cluster ions over the time range of 1 ns to 0.1 ms: lifetime and internal energy distributions 209
Collision-induced dissociation
Determination of ion–ligand bond energies and ion fragmentation energies of electrospray-produced ions by collision-induced dissociation threshold measurements 217
Critical mass
The trapping condition and a new instability of the ion motion in the ion cyclotron resonance trap 77
Cyclic molecules
The reactions of some interstellar ions with benzene, cyclopropane and cyclohexane 117

Data processing
Automatic extraction of relevant peaks and reconstruction of mass spectra for low signal-to-noise GC–MS data 171
Diols
Differentiation of stereoisomeric diols by using CH_3O-B^+OCH_3 in a small Fourier transform ion cyclotron resonance mass spectrometer 229

Electron beam ion trap
Electron beam potential depression as an ion trap in Fourier transform ion cyclotron resonance mass spectrometry 161
Electrospray
Determination of ion–ligand bond energies and ion fragmentation energies of electrospray-produced ions by collision-induced dissociation threshold measurements 217

Focal spot
Influence of the laser intensity and spot size on the desorption of molecules and ions in matrix-assisted laser desorption/ionization with a uniform beam profile 127

Fourier transform
A Fourier transform time-of-flight mass spectrometer. A SIMION calculation approach 67
Fourier transform ion cyclotron resonance mass spectrometry
Frequency shifts and modulation effects due to solenoidal magnetic field inhomogeneities in ion cyclotron mass spectrometry 101
Fragmentation
Fragmentation of sputtered Ta cluster ions over the time range of 1 ns to 0.1 ms: lifetime and internal energy distributions 209
Frequency shifts
Frequency shifts and modulation effects due to solenoidal magnetic field inhomogeneities in ion cyclotron mass spectrometry 101
Fringing fields
Ion separation in imperfect fields of the quadrupole mass analyzer. Part II. Ion beam dynamics in phase-space of the fringing field 27
FT-ICR
Differentiation of stereoisomeric diols by using CH_3O-B^+OCH_3 in a small Fourier transform ion cyclotron resonance mass spectrometer 229
FT-ICR mass spectrometry
Optimization of a fixed-volume open geometry trapped ion cell for Fourier transform ion cyclotron mass spectrometry 189
FTICR
Electron beam potential depression as an ion trap in Fourier transform ion cyclotron resonance mass spectrometry 161

Gas chromatograph
Automatic extraction of relevant peaks and reconstruction of mass spectra for low signal-to-noise GC–MS data 171

ICR
The trapping condition and a new instability of the ion motion in the ion cyclotron resonance trap 77
Imperfect fields
Ion separation in imperfect fields of the quadrupole mass analyser. Part III. Transmission and optimal ion injection 37
Ion separation in imperfect fields of the quadrupole mass analyser. Part IV. Theoretical applications 45
Ion separation in imperfect fields of the quadrupole mass analyzer. Part I. Ion beam dynamics in the phase-space 13
Ion separation in imperfect fields on the quadrupole mass analyser. Part V. Experimental verification 57
Instability of ion orbit
The trapping condition and a new instability of the ion motion in the ion cyclotron resonance trap 77
Internal energies
Fragmentation of sputtered Ta cluster ions over the time range of 1 ns to 0.1 ms: lifetime and internal energy distributions 209
Interstellar molecules
The reactions of some interstellar ions with benzene, cyclopropane and cyclohexane 117
Ion beam dynamics
Ion separation in imperfect fields of the quadrupole mass analyzer. Part II. Ion beam dynamics in phase-space of the fringing field 27
Ion dynamics
Frequency shifts and modulation effects due to solenoidal magnetic field inhomogeneities in ion cyclotron mass spectrometry 101
Ion fragmentation energies
Determination of ion–ligand bond energies and ion fragmentation energies of electrospray-produced ions by collision-induced dissociation threshold measurements 217
Ion separation
Ion separation in imperfect fields of the quadrupole mass analyser. Part III. Transmission and optimal ion injection 37
Ion separation in imperfect fields of the quadrupole mass analyser. Part IV. Theoretical applications 45
Ion separation in imperfect fields of the quadrupole mass analyzer. Part I. Ion beam dynamics in the phase-space 13
Ion separation in imperfect fields of the quadrupole mass analyzer. Part II. Ion beam dynamics in phase-space of the fringing field 27
Ion separation in imperfect fields on the quadrupole mass analyser. Part V. Experimental verification 57
Ion–ligand bond energies
Determination of ion–ligand bond energies and ion fragmentation energies of electrospray-produced ions by collision-induced dissociation threshold measurements 217
Ion–molecule reaction
Differentiation of stereoisomeric diols by using CH_3O-B^+OCH_3 in a small Fourier transform ion cyclotron resonance mass spectrometer 229
Ion/molecule reactions
The reactions of some interstellar ions with benzene, cyclopropane and cyclohexane 117
Isotope fractionation
Polyatomic ions in thermal ionisation mass spectrometry — challenges and opportunities 149

Isotope ratio
Polyatomic ions in thermal ionisation mass spectrometry — challenges and opportunities 149

Laser ablation
Mass distributions of binary aluminium cluster anions $Al_nX_m^-$ (X = O, S, P, As, C) 201
Laser beam profile
Influence of the laser intensity and spot size on the desorption of molecules and ions in matrix-assisted laser desorption/ionization with a uniform beam profile 127
Laser fluence
Influence of the laser intensity and spot size on the desorption of molecules and ions in matrix-assisted laser desorption/ionization with a uniform beam profile 127
Lifetime
Fragmentation of sputtered Ta cluster ions over the time range of 1 ns to 0.1 ms: lifetime and internal energy distributions 209

MALDI
Influence of the laser intensity and spot size on the desorption of molecules and ions in matrix-assisted laser desorption/ionization with a uniform beam profile 127
Magnetic field inhomogeneities
Frequency shifts and modulation effects due to solenoidal magnetic field inhomogeneities in ion cyclotron mass spectrometry 101
Magnetic materials
Frequency shifts and modulation effects due to solenoidal magnetic field inhomogeneities in ion cyclotron mass spectrometry 101
Magnetron motion
Electron beam potential depression as an ion trap in Fourier transform ion cyclotron resonance mass spectrometry 161
Mass distribution
Mass distributions of binary aluminium cluster anions $Al_nX_m^-$ (X = O, S, P, As, C) 201
Mass spectrometry
Automatic extraction of relevant peaks and reconstruction of mass spectra for low signal-to-noise GC–MS data 171
Experimental and theoretical study of carbon suboxide C_3O_2, protonated carbon suboxide $C_3HO_2^+$ and $C_3HO_2^\cdot$ radical in the gas phase 241
Mass distributions of binary aluminium cluster anions $Al_nX_m^-$ (X = O, S, P, As, C) 201
Metastable peaks
The observation of broad metastable ion peaks in the surface-induced dissociation mass spectra of protonated and cationated peptides 91
Methylene transfer
Gas phase substitution reactions by radical cations. Part 5: Reaction of the C–C ring-opened oxirane radical cation with 1,2-, 1,3- and 1,4-dichlorobenzene 1

Neutralization–reionization
Experimental and theoretical study of carbon suboxide C_3O_2, protonated carbon suboxide $C_3HO_2^+$ and $C_3HO_2^\cdot$ radical in the gas phase 241
Noise elimination
Automatic extraction of relevant peaks and reconstruction of mass spectra for low signal-to-noise GC–MS data 171

Optimal ion injection
Ion separation in imperfect fields of the quadrupole mass analyser. Part III. Transmission and optimal ion injection 37
Oxirane
Gas phase substitution reactions by radical cations. Part 5: Reaction of the C–C ring-opened oxirane radical cation with 1,2-, 1,3- and 1,4-dichlorobenzene 1

Penning trap
The trapping condition and a new instability of the ion motion in the ion cyclotron resonance trap 77
Peptides
The observation of broad metastable ion peaks in the surface-induced dissociation mass spectra of protonated and cationated peptides 91
Phase-space
Ion separation in imperfect fields of the quadrupole mass analyzer. Part II. Ion beam dynamics in phase-space of the fringing field 27
Photoionization
Influence of the laser intensity and spot size on the desorption of molecules and ions in matrix-assisted laser desorption/ionization with a uniform beam profile 127
Principal component analysis
Gas phase substitution reactions by radical cations. Part 5: Reaction of the C–C ring-opened oxirane radical cation with 1,2-, 1,3- and 1,4-dichlorobenzene 1
Proton affinity
Experimental and theoretical study of carbon suboxide C_3O_2, protonated carbon suboxide $C_3HO_2^+$ and $C_3HO_2^\cdot$ radical in the gas phase 241

Proton transfer
The reactions of some interstellar ions with benzene, cyclopropane and cyclohexane 117

Quadrupole mass analyser
Ion separation in imperfect fields of the quadrupole mass analyzer. Part I. Ion beam dynamics in the phase-space 13
Ion separation in imperfect fields of the quadrupole mass analyser. Part III. Transmission and optimal ion injection 37
Ion separation in imperfect fields of the quadrupole mass analyser. Part IV. Theoretical applications 45
Ion separation in imperfect fields on the quadrupole mass analyser. Part V. Experimental verification 57

Radial electric field
Optimization of a fixed-volume open geometry trapped ion cell for Fourier transform ion cyclotron mass spectrometry 189

SIFT
The reactions of some interstellar ions with benzene, cyclopropane and cyclohexane 117
SIMION
A Fourier transform time-of-flight mass spectrometer. A SIMION calculation approach 67
Sputtering
Fragmentation of sputtered Ta cluster ions over the time range of 1 ns to 0.1 ms: lifetime and internal energy distributions 209

Stereoisomers
Differentiation of stereoisomeric diols by using CH_3O-B^+OCH_3 in a small Fourier transform ion cyclotron resonance mass spectrometer 229
Surface-induced dissociation
The observation of broad metastable ion peaks in the surface-induced dissociation mass spectra of protonated and cationated peptides 91

Theory
Ion separation in imperfect fields of the quadrupole mass analyser. Part IV. Theoretical applications 45
Thermal ionisation
Polyatomic ions in thermal ionisation mass spectrometry — challenges and opportunities 149
Time-of-flight
A Fourier transform time-of-flight mass spectrometer. A SIMION calculation approach 67
Transmission
Ion separation in imperfect fields of the quadrupole mass analyser. Part III. Transmission and optimal ion injection 37
Trapped ion cells
Optimization of a fixed-volume open geometry trapped ion cell for Fourier transform ion cyclotron mass spectrometry 189
Trapping parameter
The trapping condition and a new instability of the ion motion in the ion cyclotron resonance trap 77
